Sesame projection screens from Euroscreen have an innovative design; the housing is completely recessed installed within the ceiling void. This makes them suitable for installation in suspended or plastered ceilings. Housed in smart white aluminium cases, Sesame is ideal for new-build and refurbishment projects, especially with the possibility to install the case first and screen later. The recessed function not only makes for a much more appearance, it also prevents theft and damage to the projection screen surface and mechanism. At Euroscreen we are looking after our customers individual requirements and therefore we offer Sesame in a number of different formats, materials, control options and in sizes up to 3 meters wide.
