

CAMBRIDGE AUDIO LAUNCH THE CXN (V2) AWARD-WINNING STREAMING JUST GOT EVEN BETTER.

The new CXN (V2) builds upon the legacy of the three-times What Hi-Fi? award-winning CXN Network Streamer.

The CXN (V2) is available now from cambridgeaudio.com and Richer Sounds
ERP: £800

CXN (V2) offers the following improvements:

- A faster, more powerful processor.
- MPEG-DASH and HLS compatibility enables high-quality internet radio streams.
- Listeners can enjoy more control over playback with the ability to seek through a track played over UPnP, USB or Spotify Connect.

A REFINED STREAMING EXPERIENCE

British Audio experts, Cambridge Audio, have today revealed an update to their multi-award-winning network streamer, the CXN. The CXN (V2) takes everything great about the original and further refines the experience, adding a faster processor and introducing support for high-quality internet radio streams via HLS and mpeg-DASH.

The faster processor powering Cambridge Audio's proprietary streaming platform, StreamMagic, means the CXN (V2) offers a smoother user experience and opens up new listening potential. Customers can now enjoy more control over how they listen to their music, thanks to the newly added ability to seek through tracks played over UPnP, USB or Spotify Connect.

Cambridge Audio Managing Director, Stuart George, said, “At Cambridge Audio, we’re always innovating, always striving to improve our product offering. That’s why, despite the CXN winning multiple awards, we knew we could refine the streaming experience even further.”

STUNNING SOUND

Almost 50 years of engineering expertise goes into every Cambridge Audio product to ensure customers can experience music exactly as it was meant to be heard by the artist. Nothing added, nothing taken away. The CXN (V2) is no different.

Every song played back over the CXN (V2) has even more acute detail and warm depth, so customers will be able to enjoy the nuances of music they’ve never heard in songs they’ve listened to thousands of times before.

This is achieved by passing the music through Cambridge Audio’s unique ATF2 upsampling technology and then through dual Wolfson WM8740 DACs. Audio is upscaled to a hi-res 24bit/384kHz format using polynomial curve fitting interpolation. And to ensure this technology deliver the purest sound, Cambridge Audio engineers spent hours tuning the CXN (V2) the old school way, by ear, which they believe is the only way to achieve a sound quality that genuinely moves you.

CONNECT ANYTHING

The CXN (V2) will play almost anything customers want thanks to its huge processing power and the slick functionality afforded via our award-winning StreamMagic platform.

CXN (V2) introduces mpeg-DASH and HLS compatibility out of the box, which allows for higher quality, more consistent live streams, for a better internet radio experience. Support means that many of your favourite radio stations from the BBC now available at up to 320 kbps.

CXN (V2) also features Spotify Connect, Airplay, NAS Drive/UPnP compatibility, asynchronous USB, Coax and TOSLINK digital inputs, DSD64 support and AptX Bluetooth (via the optional BT100 receiver).

COMPLETE CONTROL

Customers will find more control with the CXN (V2) as they’ll be able to seek through digital music playing from UPnP, USB or Spotify sources to pinpoint your favourite music moments. The CXN (V2) also features the outstanding levels of control introduced with the original – a large colour screen to display album artwork and commands and compatibility with the Cambridge Connect app to ensure seamless enjoyment of the unit.

CXN (V2) SPECIFICATION

DAC	Dual Wolfson WM8740 24-bit DACs
Digital Filter	2nd Generation ATF2 up-sampling to 24-bit/384kHz
Analogue Filter	2-Pole Dual Differential Bessel
USB Audio Inputs	USB Type B conforms to USB Audio profile 1.0 or 2.0 (user selectable)
Digital Audio Inputs	S/PDIF Coaxial and TOSLINK Optical
Analogue Audio Outputs	Balanced XLR and Unbalanced RCA analogue
Compatibility	UPnP, Local USB media, USB audio 1.0 and 2.0, S/PDIF Toslink and Coaxial, AirPlay, BT100 Bluetooth receiver (not supplied), Internet radio, Spotify Connect
Audio Formats	ALAC, WAV, FLAC, AIFF, DSD (x64), WMA, MP3, AAC, HE AAC, AAC+, OGG Vorbis
Max Power Consumption	30w
Standby Power Consumption	0.5w
Dimensions (H x W x D)	Maximum including sockets and controls: 85 x 430 x 305mm (3.4 x 16.9 x 12.2")
Weight	3.5kg (7.7lbs)

ABOUT CAMBRIDGE AUDIO

Since Cambridge Audio released its iconic P40 amplifier in 1968 we have pursued one simple objective: to produce audio equipment that faithfully creates a pure and natural sound. We at Cambridge Audio are sold on the unfiltered, unadulterated 'British Sound'. We believe it's simply the purest and most faithful reproduction of whatever you're listening to, so you hear music exactly the way its creators wanted it to sound. We achieve this by identifying the best possible components before carefully fine-tuning how we put them together. Put simply, we use our expertise to remove the barriers between you and your music. Nothing added, nothing taken away.

We actively encourage press and consumer reviews of all our products and we're proud that Cambridge Audio products are consistently recognised for their outstanding performance, innovation and value.
